Re: NOTICE OF PLANT CLOSING
Woodgrain Millwork
1948 N. Main Street
Prineville, OR 97754

Woodgrain Millwork has continued limited operations at the Prineville, Oregon facility since a substantial portion of the roof collapsed in November 2014. The production and management teams have worked diligently to stabilize the business and secure the operation's future. Unfortunately, due to the recent loss of significant sales volume, the operation is no longer financially viable. We will begin layoffs on December 28 and anticipate closing permanently by January 31, 2016. We have provided a minimum of 60 days' notice to the approximately 55 associates who will be affected.

Woodgrain Millwork has operations across the US and is offering employment at its other facilities to affected associates, including relocation allowance.

Manufacturing assets from the Prineville facility will be relocated to other Woodgrain facilities as practical. Specifically, Woodgrain will remain in the Exterior Door Frame business by moving that production to its Fruitland, Idaho facility.

Should you have any questions, please contact Judy Toholsky, Division Human Resources Manager, at 208-794-1675 or jtoholsky@woodgrain.com

Sincerely,

Judy Toholsky
